

Team Working Agreement

Course: COMP4350

Project Name:

Team Name:

Date Created: 25th September, 2026

Team Members

Name	Program / Year (optional)	Preferred Name / Pronouns (optional)
Gurshiv Singh Dabb	CS Major & English Minor, 4 th year,	Shiv, He/Him
Prithvi Raj Soni	CS, 4 th year	Prithvi, He/him
Alon Slonimsky	CS & Math, 5 th Year	Alon, He/Him
Shreshth Tyagi	CS, 5 th year	Shrey, He/Him
Matthew Schattka	CS, 4 th year	Matt, He/Him
Duc Cam Thai	CS Major + Math & Stats Minor, 4 th year	Cam, He/Him

1. Shared Team Goals (can add more than 3)

As a team, we agree that our shared goals for this project are:

- Professional/Finished Project
- Learn new skills/tools
- Start early, no crunch plz 🙏
- Equal workload/everyone does their agreed upon part
- Good communication, being able to ask for help
-

(Examples: learning specific technical skills, producing a high-quality final product, maintaining low stress, equal workload, meeting deadlines early, etc.)

2. Individual Goals

Each team member lists their personal goals for this project.

Team Member	Individual Goals
Alon	Develop a large project in a group with justifiable architectural decision.
Matt	Gain experience with CI/CD and to create a project that provides lots of worthwhile learning opportunities
Raj	Make something that allows me to enjoy and learn something new at the same time.
Shiv	Be able to learn and apply the concepts of COMP 4350
Shreshth	Want to get hand on experience with CI/CD and working in a big team
Cam	Be able to work with unfamiliar frameworks and gain experience with CI/CD. Also eager to learn new concepts beyond what COMP 3350 has already offered
Prithvi	Learning API concepts and the concepts of this course

3. Roles and Responsibilities

Roles may rotate unless otherwise specified. Note: none of these are developer roles. You are all responsible for development as well and these are just recommended additional roles to define.

Role	Description	Assigned To
Project Coordinator	Organizes meetings, tracks deadlines	Shiv
Technical Lead	Oversees technical decisions and code quality	Cam, Prithvi
Documentation Lead	Maintains README/docs	Matt
GitHub Manager	Manages repo structure, merges, issues	Alon
Quality Checker	Reviews work before submission	Raj

If responsibilities are shared or rotated, describe how below:

Rotate roles every sprint at least.

4. Communication Plan

Primary communication channel(s):

Discord

Expected response time:

- Weekdays: 24 Hours
- Weekends: 36 Hours
- During critical deadlines: ASAP

When is escalation required?

(e.g., no response after 24–48 hours, missed meeting, blocked progress)

5. Meetings

Regular meeting time(s): Wednesday 2:30-3:30

Meeting platform/location: In person ideally

Meeting norms (check all that apply):

- Agenda shared in advance
- Start on time
- Action items documented, designated notetaker
- Everyone contributes

What happens if someone cannot attend?

Reschedule if not urgent, otherwise read notes

6. Work Expectations

- Don't let branches fall too far behind (1 week?)
- Assign tasks/user stories/features at beginning of sprint
- A task is done once it's merged
- SOLID Please, Comment non-obvious code
- Write tests
- Plan before coding

- Deal with the consequences of code you commit (fix pipeline, bugs, etc)
-

7. Conflict Resolution & Unmet Expectations

If conflict arises or expectations are not met, we agree to follow this process **in order**:

1. Quick message asking for details
2. Refer to a vote for disagreements
3. Lauren help if critical

(Examples: direct conversation → team discussion → instructor escalation)

How will concerns be raised respectfully?

Benefit of the doubt, give people a chance to explain themselves

“I noticed ...” or “Could you explain ...”

8. Responsible GenAI Use

As a team, we have discussed the responsible and ethical use of Generative AI tools (e.g., ChatGPT, Copilot) for this project. We agree on the following shared norms:

Allowed uses of GenAI in this project include:

- If you fully understand it
- Debugging
- Dull/unimportant work
- Help reviewing/understanding code

Disallowed uses of GenAI in this project include:

- Architecture/Design Decisions
-
-

Key risks we have identified related to GenAI use (e.g., correctness, over-reliance, fairness, integrity):

- Not being able to justify decisions
- Not having learnt anything from over-reliance

How our team will ensure transparency, accountability, and shared understanding of AI-assisted work:

- Follow the above
- Disclose major AI usage

9. Accountability

If a team member repeatedly misses deadlines or responsibilities, the team will:

- Talk to them, make the team's opinions on that clear
- If that persists, see conflict resolution
- May have to reassign that work

(Be explicit — vague answers are not acceptable.)

10. Agreement

By signing below, we confirm that we have discussed this document together and agree to follow it.

Name	Signature	Date
Alon	AS	2026-09-25
Matt	MS	2026-09-25
Cam	DCT	2026-09-25
Shreshth	ST	2026-09-25
Prithvi	PRS	2026-09-25
Shiv	GSD	2026-09-25
Raj	RR	2026-09-25

Submission Instructions:

Upload this document to your **Github repository** once the repo has been created.
